

Sanford Laboratories is excited to offer direct-to-consumer laboratory testing (direct test). Direct test allows you to order a single test or several tests quickly, conveniently and confidentially without visiting your health care provider.

Direct test was developed to help you monitor certain on-going health risks. The tests are a helpful tool but should not be used as a substitute for visiting your health care provider on a regular basis.

All testing is performed in our accredited laboratory.

Any person under 18 years old must be accompanied by a parent/guardian that can consent to testing.

For more information, please call (877) 392-1234.
