

CHILD SERVICES OF Sioux Falls

■ APRIL, MAY & JUNE
■ REGION FIVE

This publication was funded by the Department of Social Services, Division of Child Care Services.

Active Supervision

Active supervision is more intentional and preventative than what we typically think of when we talk about supervision. Head Start has been implementing active supervision in their programs and has determined six components needed to make it work.

- **Set up the environment**
 - Arrange your environment for good visual supervision. Move shelves if needed to make sure you can see over them. Look for spaces that can't be supervised easily and either change the arrangement or make sure a staff person is assigned to supervise that area.
- **Position staff**
 - Be intentional about where you and your coworkers place yourself in your setting. If you work alone, make sure you are positioned so you can supervise the children easily. This goes for outside time also; staff should position themselves in different areas of the playground.
- **Scan and count**
 - As you are interacting with children, look around. Also, count the number of children in your care frequently. You should always know how many children you have even with all the arrivals and departures. Keeping a list of the children you currently have is very important, this list can be used when transitioning from one space to another. Instead of just counting heads, use your list to look for each child as you say their name and check them off the list.
- **Listen**
 - Child care environments are noisy but it's still important to listen carefully. Using your listening skills can help you identify trouble brewing and step in to prevent it. Sometimes the lack of sound can be an indicator that something is up too. When that group of children in the block area suddenly become quiet, it might be a good time to go over and see what's going on.
- **Anticipate children's behavior**
 - Since you know your children so well, use this knowledge to anticipate when they may need some help or guidance. For example, knowing that when a child in your care, starts to wander around, he or she typically disrupts other children as they are playing because he or she doesn't know how to join a group very well. Because you know this, you are able to anticipate his or her need and help him or her join a group successfully.
- **Engage and redirect**
 - Interacting with children as they are playing is another part of supervision. This allows you to observe their interests and needs which aids in supervision by being able to plan experiences which keep children engaged. It also helps so you can easily step in and redirect a child who may need some guidance.

Active supervision builds on itself, progressing from the basics of arranging the room all the way to interacting with children. Using this form of supervision ensures children are safe, engaged and learning.

Ongoing Health & Safety Training Available for Child Care Providers

The Department of Social Services with support from the Early Childhood Enrichment (ECE) system recently launched the Level II Health & Safety Training series.

The Level II online, on-demand series is designed to meet ongoing training requirements for staff working in state licensed and registered childcare programs who have completed the SD Orientation to Child Care series.

The Health & Safety Level II trainings are required to be completed within 5 years following the completion of the orientation training.
